✉ IsaacZolana.dev@gmail.com

📍 Sainte-Marthe-sur-le-Lac, QC

SKILLS

FRONTEND

React, Next.js, Angular, Blazor, TypeScript, Tailwind CSS

BACKEND

Python, FastAPI, Java, Spring Boot, C#, ASP.NET, REST APIs

CLOUD & DEVOPS

Azure, GCP, Docker, Kubernetes, Terraform, Azure DevOps, CI/CD

DATABASES

PostgreSQL, pgvector, MySQL, MongoDB, Redis

MOBILE

React Native, Jetpack Compose, Flutter, Android Studio

TESTING & QA

Playwright, Cypress, JUnit, Postman, Storybook

ISAAC ZOLANA

S O F T W A R E D E V E L O P E R

PROFILE

Software engineering student with internship experience in full-stack development, DevOps, cloud infrastructure, and AI/ML. Skilled at building web applications, improving CI/CD pipelines, and developing proof-of-concept solutions using cloud and vector search technologies.

EXPERIENCE

SOFTWARE DEVELOPER - AI/ML INTERN

Airbus Canada

Sep 2025 - Dec 2025

- Developed a RAG-based intelligent search engine proof of concept for Airbus technical publications.
- Built an XML preprocessing and indexing pipeline using dense/sparse embeddings and hybrid search.
- Used Vertex AI Workbench, Cloud Storage, Vertex AI Vector Search, PostgreSQL, and pgvector to support indexing and retrieval workflows.
- Presented technical progress during recurring demos and aligned priorities with stakeholders.

DEVOPS & INFRASTRUCTURE SPECIALIST INTERN

Workleap

Jan 2025 - May 2025

- Modernized deployment tooling and CI/CD pipelines across multiple services.
- Updated Azure DevOps pipelines for Kubernetes deployments across development, staging, and production.
- Migrated a project from Yarn to PNPM and updated scripts, documentation, and pipelines.
- Improved infrastructure security by moving application secrets to Azure Key Vault with Terraform-managed references.

AI & SEARCH

RAG, vector search, hybrid search, embeddings, Vertex AI

TOOLS

Git, GitHub, Jira, Figma, Unity, Confluence, Firebase, Supabase

EDUCATION

BACHELOR OF SOFTWARE ENGINEERING

École de technologie supérieure
Montréal, QC

2020 - Present

DIPLOMA OF COLLEGE STUDIES IN MANAGEMENT INFORMATION TECHNOLOGY

Collège Montmorency
Laval, QC

2017 - 2020

FULL-STACK DEVELOPER INTERN

Dcbel

Aug 2023 - Apr 2024

- Developed web and mobile features using Blazor and .NET MAUI.
- Built reusable UI components and integrated services with backend APIs.
- Implemented unit and end-to-end tests using Playwright.
- Designed custom Azure AD B2C authentication pages using HTML, CSS, and JavaScript.

QA & SOFTWARE DEVELOPMENT INTERN

Legalhood / OnRègle

Jan 2022 - Apr 2022

- Performed manual QA across web services and documented usability, functionality, and workflow issues.
- Built Cypress end-to-end tests to improve regression coverage and product reliability.

WEB DEVELOPER INTERN

Revenu Québec

May 2019 - Dec 2021

- Built dynamic Angular forms and reusable components for an internal service request application.
- Integrated frontend components with REST APIs while following UI/UX and accessibility standards.

SELECTED PROJECTS

PROCELO - AI-POWERED HOME IMPROVEMENT APP

Personal Project

- Building a mobile-first app that helps users plan home improvement projects with AI-assisted recommendations, budgeting, task planning, and progress tracking.
- Developed with React Native, Expo, TypeScript, and GitHub Projects for roadmap and issue tracking.

ENGINEERING INVOLVEMENT

DRONOLAB - ÉTS STUDENT CLUB

Member

- Participate in a student engineering club focused on drone-related systems, technical collaboration, and multidisciplinary project work.
